2. Project Overview

Purpose:

Insight Stream is a news aggregation platform designed to help users navigate the modern news landscape. It provides categorized, real-time, and user-friendly access to the latest news from trusted sources.

Features:

Browse news by categories (Politics, Business, Technology, Sports, etc.)

Search functionality for specific topics

Responsive and mobile-friendly design

Real-time updates via News API

Error handling for failed API requests

Performance optimizations (lazy loading, caching)

3. Architecture

Frontend: React.js with CSS (Bootstrap / Tailwind for styling)

Backend: Node.js and Express.js (for API handling, if custom backend is added)

Database: MongoDB (if user accounts, bookmarks, or preferences are stored)

API Integration: External News API (for fetching latest articles)

4. Setup Instructions

Prerequisites:

Node.js

Git

React.js

(Optional) MongoDB & Express.js

Installation Steps:

Copy code

Bash

Clone the repository

```
git clone <repo-link>
```

Install dependencies

```
cd client
```

```
npm install
```

Start frontend

```
npm start
```

5. Folder Structure

Copy code

```
InsightStream/  
|-- client/      # React frontend  
| |-- components/  
| |-- pages/  
|-- server/ (optional, if backend included)  
| |-- routes/  
| |-- models/  
| |-- controllers/
```

6. Running the Application

Frontend:

Copy code

Bash

```
cd client
```

```
npm start
```

Access: Visit <http://localhost:3000>

7. API Documentation

News API Endpoints Used:

```
/top-headlines
```

```
/everything?q=keyword
```

```
/sources
```

8. Authentication (Optional if user accounts added)

JWT-based authentication for login.

Middleware to protect user bookmarks or preferences.

9. User Interface

Landing Page: General headlines

Category Pages: Politics, Sports, Business, Technology

Search Results Page: Keyword-based filtering

Responsive Layout: Works on mobile & desktop

10. Testing

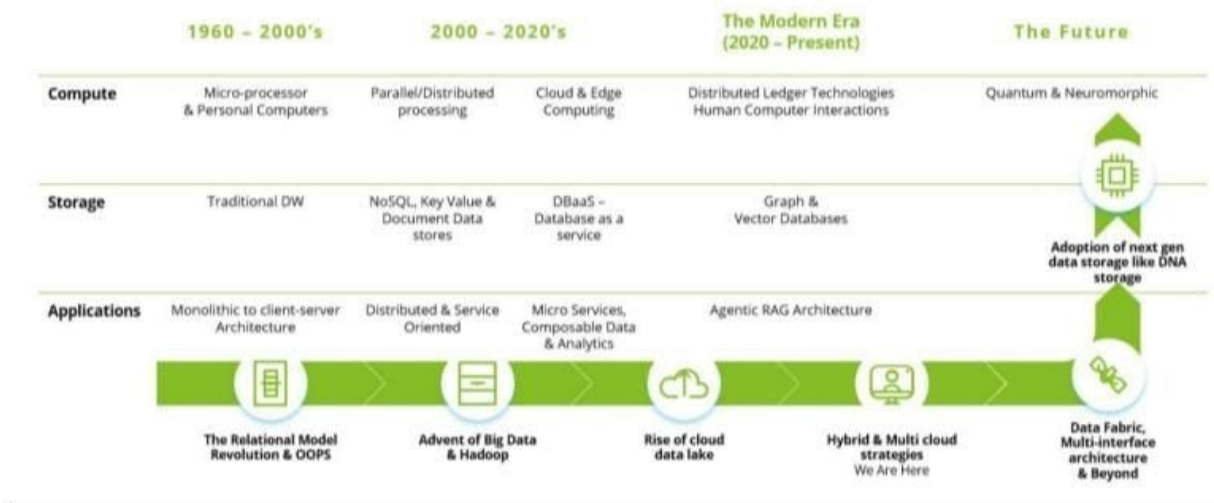

Manual Testing: Chrome Dev Tools, browser testing

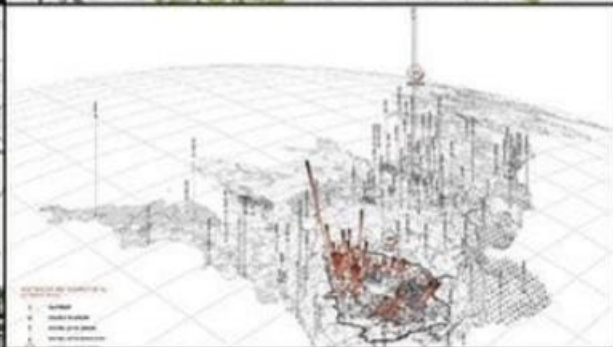

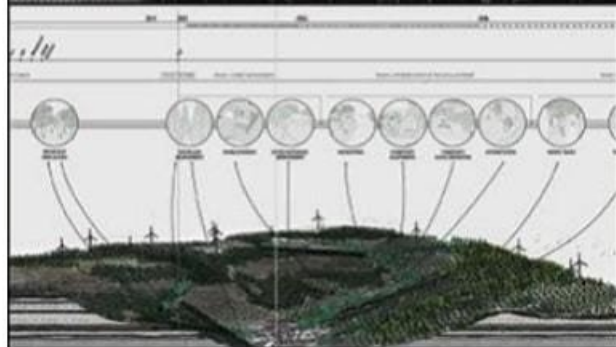

API Testing: Postman (for endpoints)

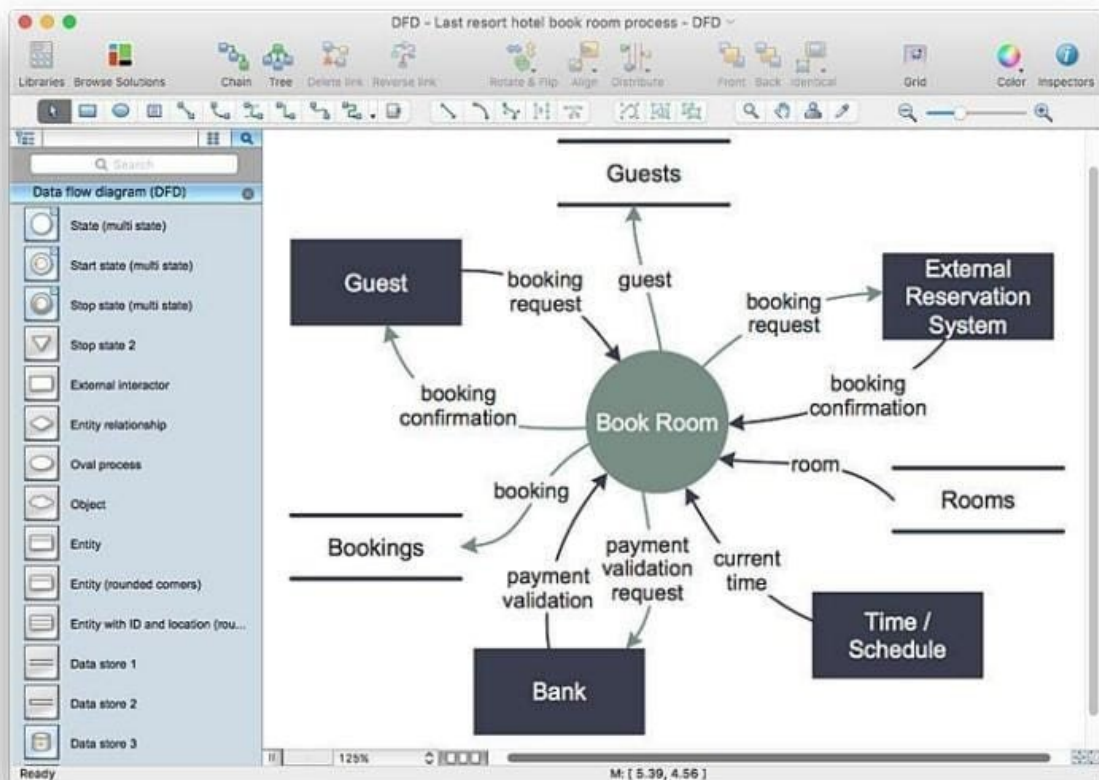

11. Screenshots or Demo

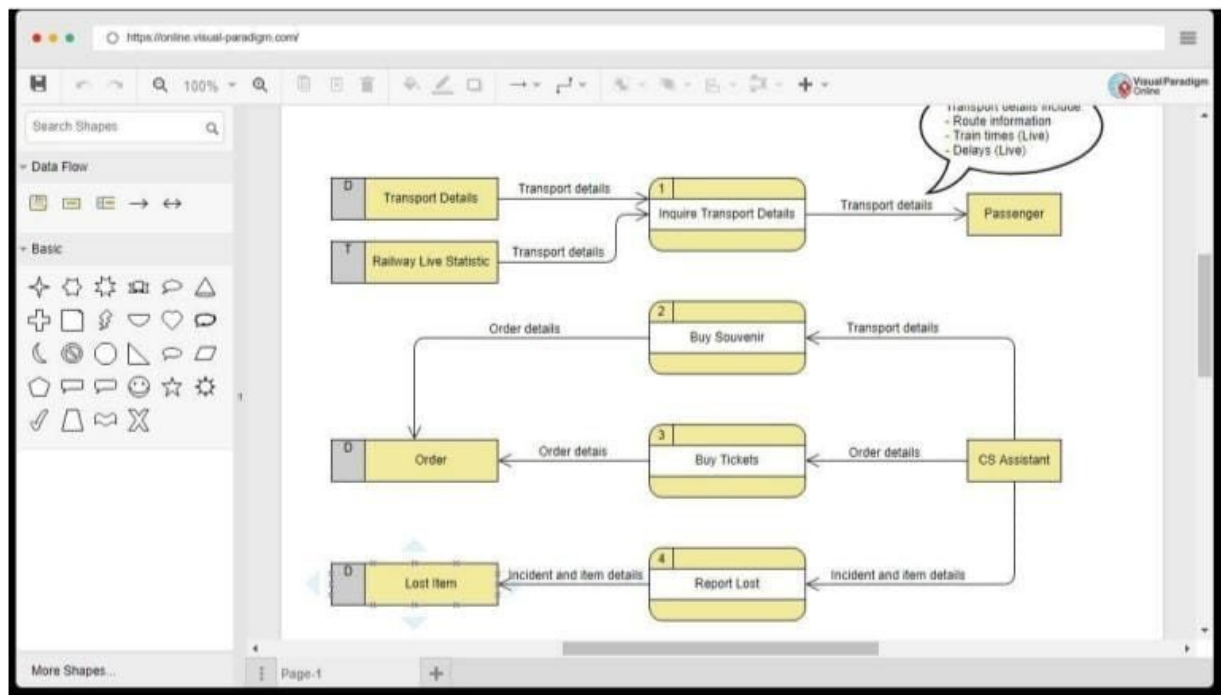

Evolution of Data & Application Architecture

The Computing and Intelligence Innovation Curve

12. Known Issues

Limited API request quota per day

Occasional delays if API server is slow

13. Future Enhancements

User authentication & personalization

Save/bookmark articles for later reading

Multilingual support for regional languages

AI-based news summarization & sentiment analysis
